PERSONAL STATEMENT

Computer Science undergraduate with hands-on experience designing and deploying scalable full-stack applications. Proficient in Java, Python, TypeScript, and React, with a dedicated focus on backend performance optimization and real-world system design. Built and deployed production-grade infrastructure including asynchronous pipelines, Docker containerization, and CI/CD workflows on GCP. Seeking a technical internship to tackle complex engineering challenges.

TECHNICAL SKILLS

- Languages:** Java, Python, JavaScript (ES6+), TypeScript, SQL
- Backend & APIs:** Node.js, NestJS, Spring Boot, REST API design, authentication (JWT), data validation, async processing
- Frontend:** React.js, HTML, CSS
- Databases:** MySQL, Firestore
- DevOps & Cloud:** Docker, Firebase Hosting, Google Cloud Platform (GCP), CI/CD basics
- Tools:** Git, GitHub, Postman, NPM, VS Code

EDUCATION

BSc (Hons): Computer Science University of Westminster (via IIT, Sri Lanka)	2024- Present
GCE Advanced Level: Physical Science Stream Isipathana College, Sri Lanka	2021-2024
GCE Ordinary Level Royal Institute, Sri Lanka	2009-2021

TECHNICAL EXPERIENCE (PROJECTS)

PocketRoom.lk — Full-Stack 3D Marketplace Platform

- Led backend development using NestJS, designing a modular monolith architecture and REST APIs.
- Built an asynchronous 3D model generation pipeline using BullMQ and Redis for concurrent processing.
- Containerized services with Docker and managed deployment on Firebase and GCP.
Tech Stack: TypeScript, NestJS, React, BullMQ, Redis, Docker, Firebase, GCP

Task Management API — Backend System (Java)

- Developed a layered Spring Boot backend with JWT authentication and role-based access control.
- Implemented REST APIs for task management, validation, and audit logging using JPA and Hibernate.
Tech Stack: Java, Spring Boot, Spring Security, JPA, Hibernate, MySQL, JWT

Data Processing Pipeline — Python System

- Built a modular pipeline for data ingestion, transformation, and storage using Pandas and NumPy.
- Implemented parallel processing with multiprocessing for efficient large-scale data handling.
Tech Stack: Python, Pandas, NumPy, Multiprocessing, SQLite/PostgreSQL

Personal Portfolio Website

- Developed a responsive portfolio using React to showcase projects and technical skills.
Tech Stack: React, HTML, CSS

CERTIFICATIONS & INDEPENDENT LEARNING

Certification

- **Introduction to SQL** | *Sololearn (October 2025)*
Successfully completed the course demonstrating theoretical and practical understanding of SQL database management and query structures.
- **Python Essential Training** | *LinkedIn Learning (April 2025)*
Completed comprehensive training (4h 22m) covering core Python syntax, programming logic, and best practices.

Self-Directed Learning

- Proactively pursued independent coursework via LinkedIn and Coursera to master Python, Data Analysis, and Front-End Development.
- Demonstrated a commitment to continuous professional development by staying updated with emerging tech trends.

KEY COMPETENCIES: TEAMWORK & LEADERSHIP

Collaborative Development

- Proven ability to work effectively in technical teams, utilizing version control systems (Git) to coordinate code integration and resolve conflicts during the SDGP and Web Design group projects.

Adaptability & Problem Solving

- Known for fast learning and creative problem-solving, demonstrated by rapidly acquiring React and TypeScript skills to deliver the SDGP project ahead of schedule.

Communication & Coordination

- Skilled in coordinating with diverse peers during university events and technical group work, ensuring clear information flow and goal alignment between team members and faculty.
